

SAP Compliance Conference Ad for Xpandion HCM Auditor Software

Who looked at the salaries table at 3 am?

Ensuring the protection of highly sensitive personnel information has never been more critical, but many SAP® customers cannot determine which users have *authorization* to access HCM data, let alone which users *actually* access and alter it.

Get End-to-End Insight with HCM Auditor™ by Xpandion

Design – Get clarity into which users have *authorization* to access specific infotypes, subtypes, personnel areas, employee groups and more

Usage Inspection – Discover which users *actually* access and alter sensitive SAP ERP HCM data

Alerts – Receive real-time alerts when any unusual or sensitive activity is performed; react instantly and prevent leakage of sensitive information.
